

TURN HANDWRITTEN NOTES INTO DIGITAL TEXT, FILES AND IMAGES

The Logitech io2 Digital Writing System is the fastest way to go from the handwritten page to digital documents, images, attachments, and editable text — you can even directly input into favorite applications. Take notes in ink and sketch ideas like you do everyday, and use the ideas and images immediately without retyping or scanning. Three components — digital pen, smart paper, and software — work together to put the information on your PC where you can easily find it, use it, and share it.

Hardware

The new Logitech io2 pen offers performance and reliability in a compact size, and is the perfect solution for mobile professionals, office workers, or any organization looking for easy mobile data capture. The pen connects to your PC through a compact collapsible USB cradle.

- Memory stores up to 40 pages between transfers
- Battery lasts up to 25 pages between charges

Software

With the Logitech io2, notes can go directly from ink to the software you use most often, or kept as digital information and organized in one place on your PC.

- Search everything you write
- Handwrite appointments and action items into Microsoft Outlook or Lotus Notes
- Export your notes to Microsoft Word, Journal, OneNote, and other applications
- Write email when you're away from your computer
- Create Post-it® reminders on your PC desktop

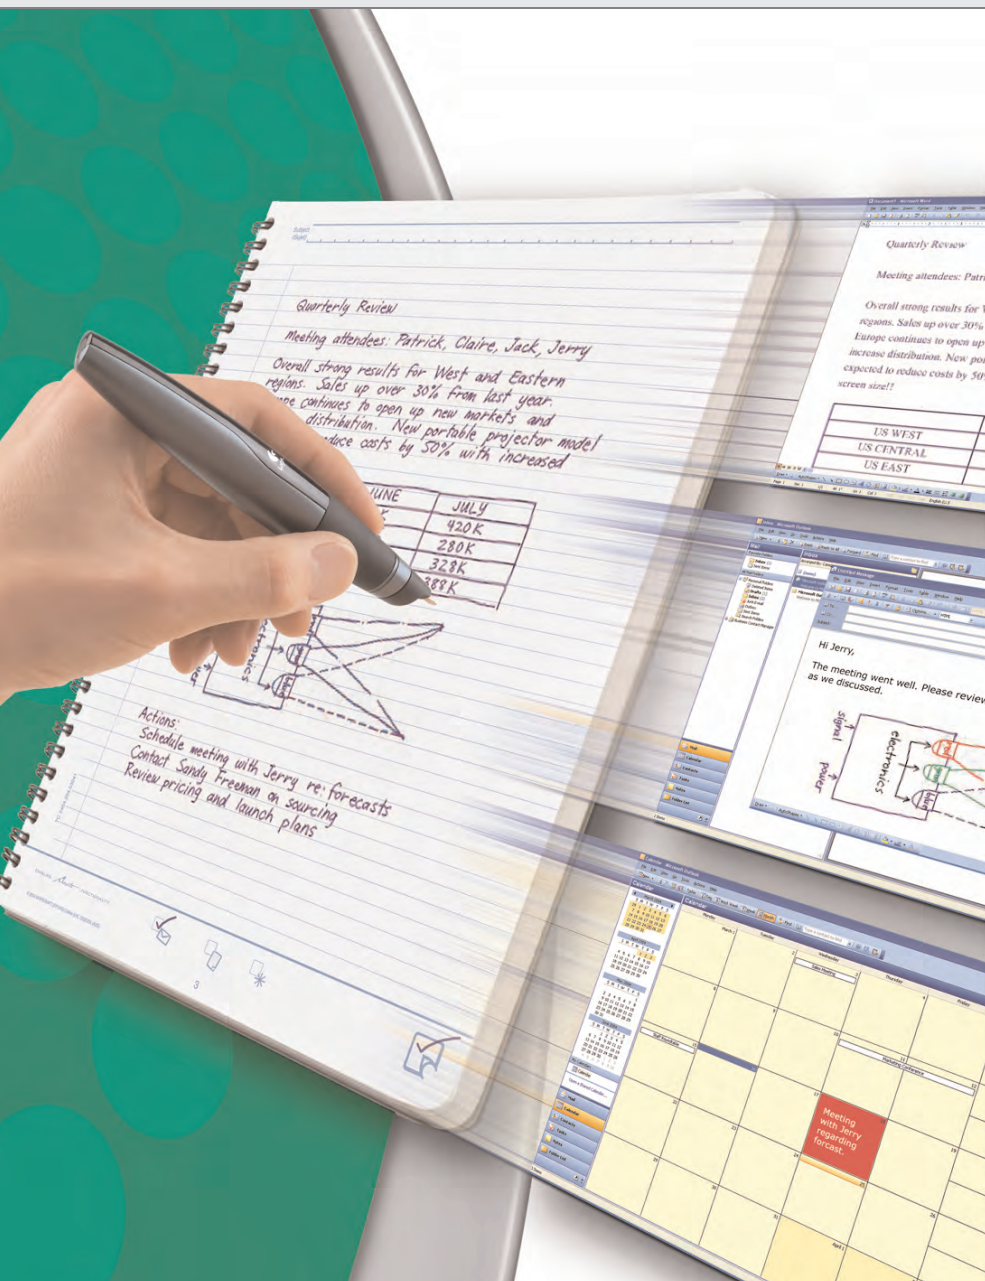

Bundled with the Logitech io2 software, MyScript® Notes for the Logitech io Pen converts handwriting to digital text. This software includes:

- Recognition support for: English, French, German, Spanish (new), Italian (new)
- MyScript® Trainer (module to teach application your writing style)
- MyScript Editor (allows for additions of ink strokes)

Paper

Smart paper is an essential part of the Logitech io2 digital writing system. Many standard notebooks are widely available, including a selection from Logitech, Mead, 3M and FranklinCovey. And, with the ioDirect paper service from Logitech, your paper is always just a click away.

You can also work with our paper vendors to create custom forms and solutions for your organization. To learn more visit: www.logitechio.com/iobusiness
